

Sonoma Valley Worm Farm

VermiComposter CF 40

Our Vermicomposter CF 40 produces exceptionally high quality vermicompost when used in conjunction with our aerated composting system. It is well-suited for greenhouse operations, organic growers, and any farm with some animals or a local manure source. It also represents an opportunity for college and corporate campuses to “close the loop” of their organic waste stream by converting cafeteria food waste for application to their lawns and landscapes as a unique soil amendment.

The Vermicomposter CF 40 promotes efficient conversion of thermo-compost feedstock by the worms. The resulting vermicompost is biologically dynamic material that promotes seed germination and seedling development while inhibiting soil-borne diseases and pests and enhancing nutrient availability. Its potency enables preparation of high-impact vermicompost tea that can be sprayed on crops or delivered by irrigation for a boost in growth performance.

Features

- 10 years of proven success
- Engineered design
- Continuous Flow-Thru technology
- Industrial grade components
- Automated breaker-bar harvesting
- Easy to set up and maintain
- Includes operator manual

Specifications

System capacity	14.8 cubic yards / 11.30 cubic meters
Production output	2 cubic yard / 1.4 cubic meters per month
Material.....	Cold rolled steel framing Galvanized steel cross-supports and flooring Zinc fasteners
Electrical.....	110V/220V with solar option
Weight.....	3210 lbs / 1459 kg
Dimensions.....	40 x 5 x 4 ft 12 x 1.5 x 1.2 m
